

Jade 2.0

Don't just filter pollutants. Remove them.

JADE air purifier is one of the world's most advanced standalone, premium, commercial-grade air purifier.

By purifying your air, you benefit from:

Reduced Absenteeism

Purified air can reduce airborne pollutants, viruses and bacteria that spread illness, reducing the rate of absenteeism in your workplace.

A Safe Workplace

Give staff and visitors a sense of wellbeing and confidence that their health and safety is a priority.

Positive Associations

Make an impression on employees and visitors, and forge a positive association with your business.

Product Overview

Innovative Technology

- Jade 2.0 captures nearly 100% of air pollutants, viruses, bacteria, and fungus in indoor air
- Sound engineering allows a large airflow at < 50 dB, making it whisper quiet
- Lowest cost per cubic foot of air cleaned over a 5 year period
- Multiple distinct stages that filter, sterilize and re-energize indoor air.

The Stages of Air Purification

- Pre-Filter Stage
- Proprietary HEPA-Rx Filter
- Activated Carbon Filter
- UV-C+ Lamp
- Revitalizing Negative Ion Chamber
